

TIGERS Pre-K - Kindergarten

The tiger is the biggest of all living cats. Their fur is reddish-orange with black stripes. Each stripe pattern is one of a kind. Male tigers have thick fur around their necks. This is called a “collar” or “ruff”. Tigers are very strong.

Baby tigers are called “cubs”. They can have up to 7 babies at one time. After they grow up they move away from their family. They live alone most of the time.
