

LEOPARD Pre-K - KINDERGARTEN

Leopards can be orange with black spots or brown with black spots. The spots are on the cat's skin. Each pattern is one of a kind. Leopards are very strong. Males are usually larger than females.

Baby leopards are called cubs. They usually have 1-3 babies in a litter. After they grow up, they move away from their family. They live alone most of the time.
